MAN IN THE MIDDLE ATTACK **TUTORIAL KALI**

Hello guys, in this tutorial you can find how run a man in the middle attack with my favorite tool : Subterfuge.

Sorry for my bad english, I'm french.

So, let's go !

STEP 1 :

Download the script LazyKali and folder HackPack here :
http://code.google.com/p/lazykali/downloads/list

and put the folder and the run in your Desktop

STEP 2 :

Open your terminal and unzip hackpack with the command : tar -xvzf

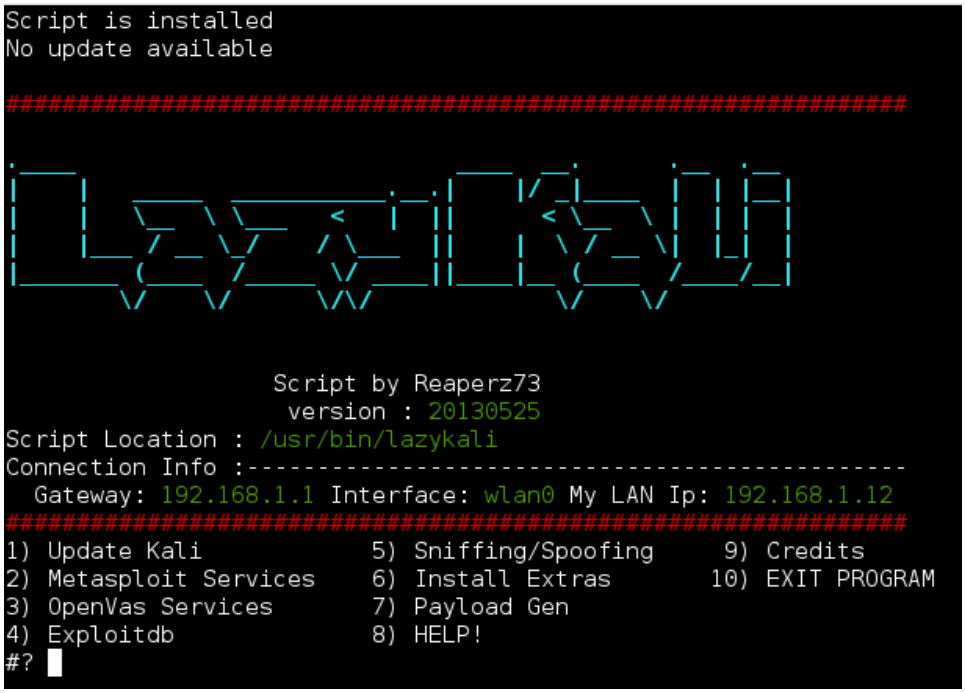

STEP 3 :

In your terminal type the command :

cd Desktop
ls
chmod +x lazykali.sh
./lazykali.sh

STEP 4

After the installation run it with in typing lazykali in the terminal :

STEP 5

Type 6 and clik enter then type 3 and click enter.

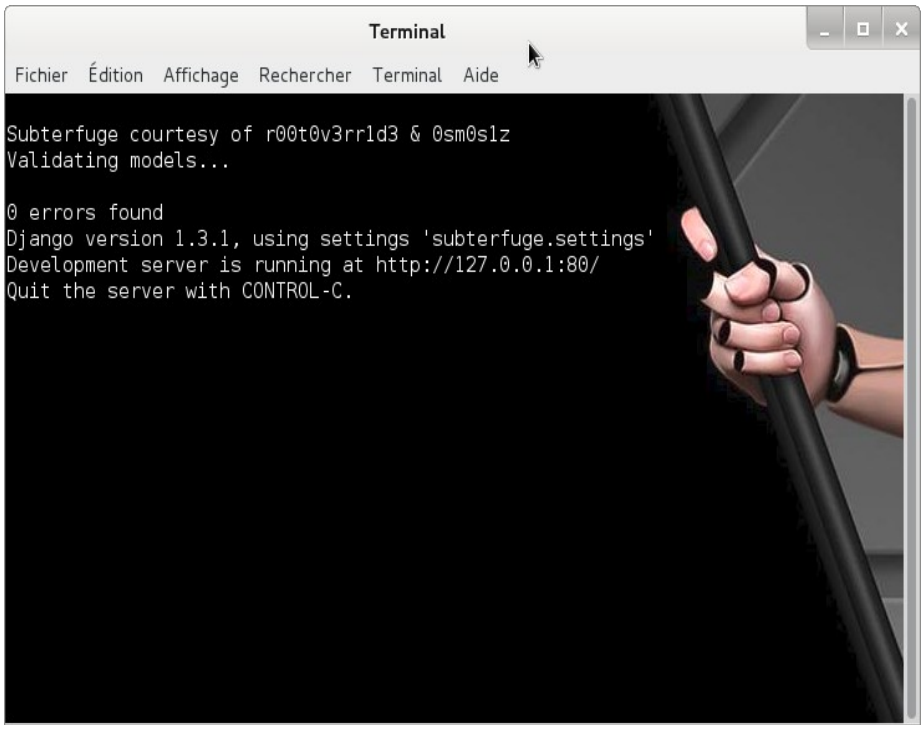

Then type Y and click enter for install HackPack.

STEP 6

After this, you must have HackPack menu :

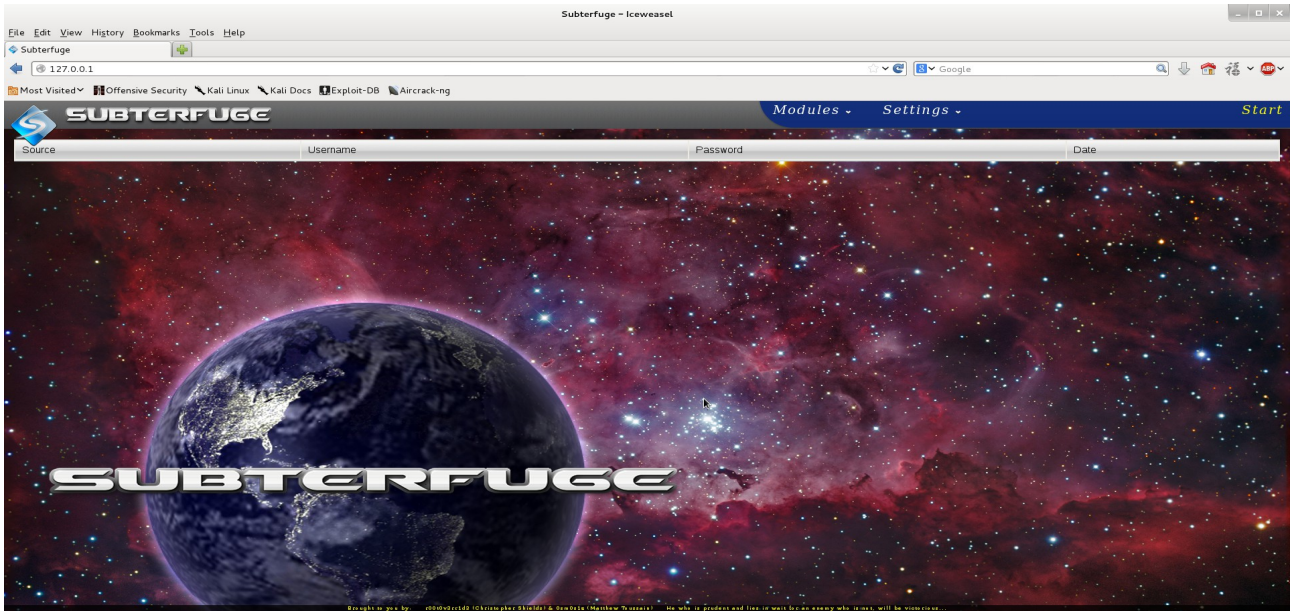

Go to Sniffing/Spoofing and run Subterfuge.

STEP 7 :

Go to 127.0.0.1:80 with your favorite navigator.

Click on Settings and chose your interface, here I chose wlan0 and my gateway is 192.168.1.1.

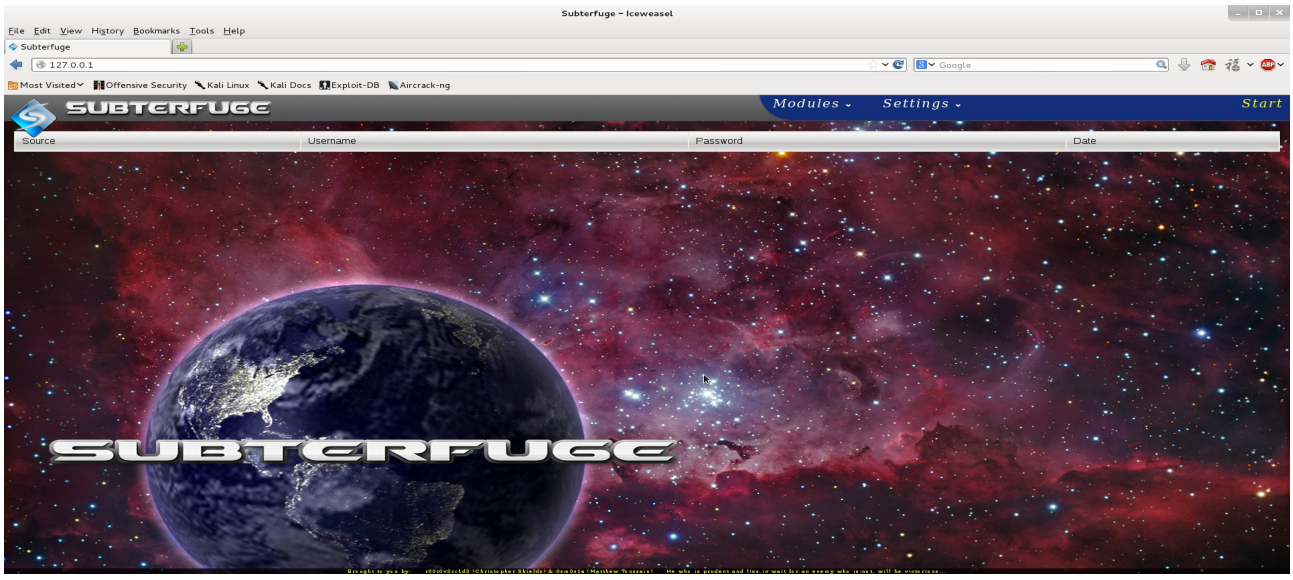

Uncheck « autoconfigure »

Then click on Apply at right bottom.

Wait 2-5 seconds and after the automatic refresh click on Subterfuge at the left top for return to the same screen as my screenshot.

STEP 8 : Go to the attack !

Click on start at the right top.

Subterfuge is now running, just wait for clients :D

Now, I use my smartphone connected to my wi-fi network for a test.

This MITM attack works for everything (facebook, gmail, outlook..., amazon, twitter, torrent...)

AS WE CAN SEE WE SNIFF EVERYTHING ! So easy :)

Click stop for stop ahah sure.

Probably the worst tutorial on the web, I guess. If you have questions or if you need help contact me on facebook : Adrien Alquier
